

### Series description Wilo-TOP-S

#### > Note

EEL classification for each pump type, see Chapter: "Planning guide"

#### Design

Glandless circulation pump with screwed connection or flange connection. Preselectable speed stages for power adjustment.

#### Application

Hot-water heating systems of all kinds, industrial circulation systems, air-conditioning systems and closed cooling circuits

#### Type key

Example: **TOP-S 40/10**  
**TOP-S** Standard pump (screw-end or flange-end pump)  
**40/** Nominal connection diameter  
**10** Nominal delivery head range [m] at  $Q = 0 \text{ m}^3/\text{h}$

#### Options

- Special version for operating pressure PN 16 (at additional charge)
- Version for special voltages on request.

#### Special features/product benefits

- Can be used in heating systems and in cooling/air-conditioning systems from  $-20 \text{ }^\circ\text{C}$  to  $+130 \text{ }^\circ\text{C}$
- Manual power adjustment with 2 speed stages (for pumps 1~230 V with  $P_2 \geq 350 \text{ W}$ ) or with 3 speed stages
- Pump housing with cathaphoretic (KTL) coating for the prevention of corrosion by condensation formation
- With thermal insulation as standard
- Simple installation due to combination flange PN 6/PN 10 (for DN 40 to DN 65)
- Cable feed in to terminal box possible on both sides (from  $P_2 \geq 180 \text{ W}$ ) with integrated strain relief device
- Protection class IP 44

Heating, air-conditioning, cooling

### Pump curves Wilo-TOP-S

#### Wilo-TOP-S 50/15

Alternating current

Three-phase current

#### Wilo-TOP-S 65/7

Alternating current

Three-phase current

# Heating, air-conditioning, cooling

## Standard pumps (single pumps)

### Terminal diagram, motor data Wilo-TOP-S

Motor data
